INDEX TO VOLUME 6

SUBJECT INDEX

Abortion, prostaglandin $F_{2\alpha}$, 353
Acid and alkaline phosphatase activities, Cu-T device, 191
Alkaline phosphatase activity, Cu-T device, 191
α-Amylase in endometrium, 373
Antibodies against uterine fluid and blastocysts, inhibition of implantation (rat), 93
Blastocystotoxic effect of copper (mouse), 281
Blastocysts, antibodies against (rat), 93
Carbohydrate metabolism, effect of vitamin B_6 in women taking steroid contraceptives, 265
Carotenoids, effect of steroid contraceptives, 275
Cervical mucus, trace elements, 37
Chemical occlusion of vas (rat), 329
Chlormadinone impregnated silastic devices, histologic effects (rabbit), 287
Combination oral contraceptives, dose-response clinical study, 17
Contraceptive action, reversibility of copper and zinc (rat, rabbit), 241
Contraceptive effect, iron (rat, mouse), 65
Copper
    blastocystotoxic effect (mouse), 281
    reversibility of contraceptive action (rat, rabbit), 241
Copper concentration, Cu-T device, 219
Copper IUCD (rat), 459
    enzyme activity of endometrium (rat), 459
Copper IUD, 449
Copper wire, inhibition of sperm motility, 71
Copper-7 IUD, clinical experience, 99
Copper-T device (see also Cu-T device), 37, 191, 207, 219
    effect upon endometrial morphology, 207
    influence on copper concentration in uterine washings, 219
    influence on endometrial acid and alkaline phosphatase activities, 191
    influence on endometrial β-glucuronidase activity, 191
    influence on endometrial lactic dehydrogenase activity, 191
    influence on enzyme activities in uterine washings, 219
    influence on protein concentration in uterine washings, 219
    trace elements in cervical mucus, 37
    trace elements in endometrium, 37
    trace elements in plasma, 37
Copper-T intrauterine contraceptive system, clinical experience, 179
Copper-T IUD, 513
    hysterographic studies, 513
Cu-7 IUD, clinical experience, 99
Cu-T device (see also Copper-T device), 373, 449
    glycogen content of endometrium, 449

Dose-response clinical study, combination oral contraceptives, 17
Education, influence on fertility of family planning acceptors, 145
Electrolytes, uterine fluid (rat), 489
Embryogenesis, effect of polyethylene IUD (rat), 305
Endometrial acid and alkaline phosphatase activities, Cu-T device, 191
Endometrial β-glucuronidase activity, Cu-T device, 191
Endometrial lactic dehydrogenase activity, Cu-T device, 191
Endometrial morphology, Cu-T device, 207
Endometrium
    α-amylase, 373, 385
    Cu-T device, 373
    enzyme activity (rat), 459
    glycogen content, 449
    glycogen synthetase, 373, 385
    phosphorylase, 373, 385
    trace elements, 37
Enzyme activities, Cu-T device, 219
Enzyme activity of endometrium, copper IUCD (rat), 459
Estrogen
    postovulatory effect on progesterone (monkey), 411
    postovulatory effect on prostaglandin F (monkey), 411
Estrus cycle, uterine fluid (rat), 489
Ethinyl estradiol-norethindrone acetate, dose-response clinical study, 17
Extra-amniotic administration, prostaglandin $F_{2\alpha}$, 353
Family planning acceptors, influence of education on fertility, 145
Family planning program, laparoscopic sterilization, 295
Fertility, influence of education of family planning acceptors, 145
Fertility control, daily megestrol acetate, 361
Fertility regulation, prostaglandin $F_{2\alpha}$, 479
FSH, exogenous testosterone effect (male), 135
FSH releasing potency, synthetic decapeptide, 55
p-Glu-His-Trp-Ser-Tyr-Gly-Leu-Arg-Pro-Gly-NH_2 (synthetic decapeptide), 55
β-Glucuronidase activity, Cu-T device, 191
Glycogen content of endometrium, Cu-T device, 449
Glycogen synthetase in endometrium, 373
Histologic effects, intracervical chlormadinone impregnated silastic devices (rabbit), 287
Hysterographic studies, Copper-T IUD, 513

Implantation, inhibition by antibodies against uterine fluid and blastocysts (rat), 93
Impregnation, effect by sperm proteins (rabbit), 109
Injectable contraceptive agent, medroxyprogesterone acetate, 315
Intracervical chlormadinone impregnated silastic devices, histologic effects (rabbit), 287
Intrauterine contraception
    Cu-T device, 37
    Copper-T device, 191, 207, 219

Intrauterine contraceptive system, copper-T, 179
Iron, contraceptive effect (rat, mouse), 65
IUCD (see also IUD, IUFB)
    copper (rat), 459
IUD (see also IUCD, IUFB)
    copper-7, 99
    copper-T, 179, 513
    copper-T device, 37
    Cu-T device, 449
    polyethylene, effect on embryogenesis (rat), 305
    progesterone release from polyethylene devices (rat, pig), 423
    silicone Shell, 127
IUFB (see also IUCD, IUD)
    effect on sodium and potassium of uterine fluid (rat), 499
Lactic dehydrogenase activity, Cu-T device, 191
Laparoscopic sterilization, 295
Laparoscopy, teaching, 151
LH, exogenous testosterone effect (male), 135
LH-releasing factor (LRF) (monkey), 465
LH releasing potency, synthetic decapeptide, 55
LH surge, suppression by mestranol-lynestrenol, 1
Low dose, evaluation of quingestanol acetate, 117
Low-dose, mestranol-lynestrenol, 1
LRF (LH-releasing factor) (monkey), 465
LRF, insensitivity to synthetic (monkey), 465
Lynestrenol, low-dose with mestranol, 1
Medroxyprogesterone acetate
    injectable, contraceptive use-efficacy, 315
    injectable contraceptive agent, 315
Megestrol acetate, 361
    daily, fertility control, 361
Mestranol-lynestrenol, low-dose, 1
Metals, influence on sperm migration, 231
Midcycle LH surge, suppression by mestranol-lynestrenol, 1
Morphology, endometrial, Cu-T device, 207
Norethindrone acetate-ethinyl estradiol, dose-response clinical study, 17
Occlusion of vas, chemical (rat), 329
Oral contraceptive, low dose quingestanol acetate, 117
Phosphorylase in endometrium, 373
Plasma, trace elements, 37
Plasma carotenoids, effect of steroid contraceptives, 275
Polyethylene devices, release of progesterone (rat, pig), 423
Polyethylene IUD, effect on embryogenesis (rat), 305
Potassium, effect by IUFB (rat), 499
Progesterone, effect of postovulatory estrogen (monkey), 411
Progesterone release, polyethylene devices (rat, pig), 423

Prostaglandin F, effect of postovulatory estrogen (monkey), 411
Prostaglandin $F_{2\alpha}$
abortion by extra-amniotic administration, 353
fertility regulation, 479
vaginal administration, 479
Protein concentration, Cu-T device, 219
Proteins, sperm, delayed impregnation (rabbit), 109
Quingestanol acetate, evaluation of low dose, 117
Radiochemical method
assay of α-amylase, 385
assay of glycogen synthetase, 385
assay of phosphorylase, 385
Reversibility of contraceptive action of copper and zinc (rat, rabbit), 241
Serum FSH and LH, effect by exogenous testosterone (male), 135
Silastic devices, chlormadinone impregnated, histologic effects (rabbit), 287
Silicone Shell IUD, 127
Sodium, effect by IUFB (rat), 499
Sperm migration, influence by metals, 231
Sperm motility, inhibition by copper wire, 71
Sperm proteins, delayed impregnation (rabbit), 109
Steroid contraceptives, effect of vitamin B_6 on carbohydrate metabolism, 265
Steroid contraceptives and plasma carotenoids, 275
Synthetic decapeptide (p-Glu-His-Trp-Ser-Tyr-Gly-Leu-Arg-Pro-Gly-NH_2), 55
FSH releasing potency, 55
LH releasing potency, 55
Synthetic LRF (monkey), 465
TCu-200
clinical experience, 179
hysterographic studies, 513
Teaching laparoscopy, 151
Testosterone, exogenous, effect on serum FSH and LH (male), 135
Uterine fluid
antibodies against (rat), 93
IUFB effect on sodium and potassium (rat), 489
Uterine fluid electrolytes and estrus cycle (rat), 489
Vaginal administration, prostaglandin $F_{2\alpha}$, 479
Vaginal foam tablet, clinical field test, 401
Vaginally applied iron, contraceptive effect (rat, mouse), 65
Vas, chemical occlusion (rat), 329
Vitamin B_6, effect on carbohydrate metabolism in women taking steroid contraceptives, 265
Zinc, reversibility of contraceptive action (rat, rabbit), 241
